The speakers of RUMI J Project Meeting

Prof Keles (below) was talking about the pathophysiology of the Immune Sytem

Summary

This online J Project Meeting was organized together with the Clinical Immunology Society and RUMI Pediatric Society in Konya to increase awareness on primary immunodeficiency (PID) diseases among pediatricians, internalists and family physicians. The main topic was 'The approach to a child with recurrent infections'. This Meeting was held on February 24, 2021 and it was the 285th JP Meeting since the beginning in 2004. The meeting was co-organized with the Necmettin Erbakan and Selçuk Universities and primarily focused on diagnosis and treatment of challenging PID cases diagnosed by pediatricians and internalists.

The moderators of RUMI J Project Meeting were Prof Ilhan Tezcan from Hacettepe University and Prof Ismail Reisli from Necmettin Erbakan University. Prof Tezcan is also the President of Clinical Immunology Society and he focused his talk on the importance of early diagnosis and treatment for the patients with PID and thanked to Prof Reisli for his valuable effort to organize a serious of J Project Meetings as well as three JP Congresses in Turkey. After Prof Reisli gave his lecture about the approach to a patient with recurrent infections, Prof Keles and Assoc. Prof Guner talked about current IUIS classification of primary immunodeficiencies and their treatment modalities. Prof Artac and Assoc Prof Arslan presented their pediatric and adult cases. These cases were mainly about Bruton's disease, severe combined immunodeficiency and common variable immunodeficiency.

There were 175 participants attended this online meeting. The participants discussed the importance of early diagnosis and early treatment of the patients with PID. I would like to thank all participants for their participation to this J Project Meeting, and also thank CSL Behring Company for their sponsorship to make this organization possible.

Prof. Ismail Reisli, MD Leader of the J Daughter Anatolia Project Konya-Turkey
